MATHEMATICAL REVIEWS

Published by

AMERICAN MATHEMATICAL SOCIETY

Editorial Committee: R. G. Bartle, M. Hochster,
M. Lowengrub
Editors: A. A. Armendáriz, W. Bouwsma, E. Gerlach,
A. Greenspoon, W. S. Hall, P. D. F. Ion, S. Ivanov,
J. S. Joel, M. Rabinathan, P. B. Smith,
S. Zdravkovska
Editorial Consultants: A. Azarkhin, F. J. Beutler,
J. W. Brown, F. Harary, A. E. Heins, D. J. Lewis,
R. J. Muirhead, M. S. Ramanujan, J. F. Riordan,
R. A. Scott, C.-T. Shih, N. Starr

Executive Editor: J. L. Selfridge (on leave)
Acting Executive Editor: W. B. Woolf
Associate Executive Editor: J. E. Kister
Office Manager: F. E. Bryant
Manager, Editorial Assistants: D. J. Kimball
Head Librarian: J. Seidler
Editorial Associate: B. D. Dudzik
Production Manager: S. K. Barth
Reviewer Services: L. M. Dann
Author Records: P. A. Gerber

General Information

Journal references in Mathematical Reviews are given in the following form: *Rückschritte der Math.* (6) 5(56) (1960/61), no. 2, 18-53 (1962), where, after the abbreviated title, one has: (series number) volume number (volume number in first series, if given) (nominal date), issue number if necessary, first page-last page (imprint date). If only one date is given, this will usually be interpreted as the nominal date and will follow the volume number. If no volume number is given, the year will be used in its place. The symbol ★ precedes the title of a book or other nonperiodical that is being reviewed as a whole. If an issue of a journal needs to be reviewed as a whole (e.g., when it is a collection of articles dedicated to an individual) and an ad hoc title is devised for this purpose then the latter will appear in braces { }.

References to reviews in Mathematical Reviews before

Volume 20 (1959) are by volume and page number, e.g., MR 15, 122; from Volume 20 to Volume 58 (1979), by volume and review number, e.g., MR 20 #4185 or MR 23 #A513; from 1980 on, by issue and review number, e.g., MR 80a:46017. References to reviews in *Jahrbuch über die Fortschritte der Mathematik* and *Zentralblatt für Mathematik* are by volume and page number for the period before 1972 (e.g., Jbuch 50, 173; Zbl 29, 323) and by volume and review number since 1972 (e.g., Zbl 218:46017). Reviews reprinted from *Applied Mechanics Reviews*, *Computing Reviews*, *Mathematics of Computation*, *Physics Abstracts*, *Referativnyi Zhurnal Matematika* (Mekhanika, etc.), or *Zentralblatt für Mathematik* are identified in parentheses following the reviewer's name by AMR, CR, MC, PA, RZhMat (RZhMekh, etc.), Zbl, respectively.

Editorial Office: University of Michigan, Ann Arbor, Michigan. Editorial correspondence should be addressed to MATHEMATICAL REVIEWS, 611 Church St., PO Box 8604, Ann Arbor, Michigan 48107, USA.

Subscription information: Subscription prices for the year 1984 of Mathematical Reviews including the annual index are \$2200 list, \$1650 institutional member, \$208 individual member (\$233 outside the United States), \$142 reviewer (\$167 outside the United States). Nonindividual subscribers outside the United States and India must pay a postage surcharge of \$35; nonindividual subscribers in India must pay a postage surcharge of \$45. Combination paper and microfiche subscription prices are \$2926 list, \$2195 institutional member. Microfiche of each issue will be mailed the fastest way possible as each issue is published.

Back number information: Back number prices per volume: Volumes

1-12, \$450 list, \$338 member; Volumes 13-44, \$600 list, \$450 member; Volumes 45-58, \$900 list, \$675 member. Back number prices for 1980 are \$1900 list, \$1425 member; for 1981, \$2200 list, \$1650 member; for 1982 or 1983, \$2800 list, \$2100 member. Back volumes are available in microform from University Microfilms International, 300 North Zeeb Road, Ann Arbor, Michigan 48106.

Mathematical Reviews is published monthly plus, in December, an annual author and subject index issue. Cumulative author indexes exist for 1940-59, 1960-64, and 1965-72. A cumulative author and subject index exists for 1973-79.

Subscriptions and orders should be addressed to the American Mathematical Society, PO Box 1571, Annex Station, Providence, RI 02901. All orders must be accompanied by payment. Other correspondence should be addressed to PO Box 6248, Providence, RI 02940.

Second Class Postage Paid at Providence, Rhode Island, and at additional mailing offices

PREFACE

This annual index of Mathematical Reviews is included with each subscription and is available separately. It is also called Vol. 16 of the Index of Mathematical Papers (IMP). Vols. 6-9 of IMP are the annual indexes of MR for the years 1974-77, and are available as a set. The 1978 annual index was the first to be included with each subscription. There are cumulative author indexes to MR that cover 1940-59, 1960-64 and 1965-72, and cumulative author and subject indexes for 1973-79.

The classification scheme used in the present index is the 1980 Mathematics Subject Classification scheme. Starting in January 1985, a revised version of this scheme will be used in MR. A copy of the revised version is printed in the back of the subject portion of this index.

The entries in the author and key indexes give full bibliographic information about all items reviewed in MR. These entries are accompanied by MR numbers and classification numbers; secondary classification numbers are given in parentheses. In the subject index, an item listed under its secondary classification has the MR number given in parentheses. A star (★) preceding a title indicates a book, or other item which is not a periodical, that is reviewed as a whole.

ALPHABETICAL ORDER; SEPARATE KEY INDEX

Reviewed items are listed alphabetically by author; items having several authors are listed in full under each author (this was not done in the 1940-72 cumulative indexes). Surnames consisting of more than one part (e.g., de Branges, van der Corput) are listed under the first capital letter. Collections, proceedings and other similar publications that may have editors but do not have specific authors are given alphabetically by title in a separate list (called the "Key Index") following the author index.

CROSS-REFERENCES

There are three kinds of cross-references in this index.

(a) *Name variations.*

An author's primary name is the variation of the name which MR has chosen on the basis of frequency and currency of usage. We usually list all items by a given author under that author's primary name, and cross-references to the primary form are given from sufficiently distinct alternative forms of the author's name that have been used in items reviewed.

(b) *Authors in other capacities.*

In the author index, the names of persons associated with an item in a capacity other than that of author (e.g., editor, translator, subject of a biography, etc.) are also listed. In the subject index, such names are given in parentheses in the positions that they would occupy had they been authors. In both indexes these items occur only as cross-references to complete listings.

(c) *Key entries.*

Certain collections that are listed under their titles, described in section 1 above, are also listed under other headings, called "key entries". For example, the publication entitled *Proceedings of the Conference on Approximation Theory* is listed under "Proceedings: Conference on Approximation Theory" and also under the heading "Conference: Approximation Theory" and under the place and date of the meeting. These listings are not true cross-references, since a complete entry appears under each heading. However, there are such "key entries" that are cross-references: e.g., a cross-reference to an author if his paper contains an extensive bibliography, an obituary notice or reference to a special event.

ARRANGEMENT OF ENTRY

The full entries under a given heading (i.e., the primary name of an author, or a title) are listed in order of nominal publication dates; the cross-references are in MR number order after the full entries. For this purpose coauthored items are treated on the same basis as those written by the author alone.

The arrangement of each title entry is that of the heading of the review in MR. All titles not in English are given in English translation (with the language of the original following in parentheses and accompanied by the mention of the summaries in other languages). Book and monograph titles in languages other than English are given in the original language or in a transliteration from the original; the title is then followed by the language of the original, in parentheses, and an English translation of the title, in brackets.

The general form for title entries is as follows:

Books, Monographs: Title. (Language of original {if necessary}) [English translation of title {if necessary}] Miscellaneous information {edition, editors, translators, series, etc.}. Publisher, city, date. Pagination. (Reviewer's name) Review number.

Journal article: Title of article. (Language of original {if necessary}). Summaries in languages other than the original {if necessary} Journal abbreviation {including series number if necessary} volume number(volume number in first series if given) (nominal date), issue number {if necessary}, first page-last page (imprint date). (Reviewer's name) Review number.

The first part of the review number refers to the issue in which the review was published and the second part refers to its position within the issue. The first two digits of the second part are the general subject classification.

TRANSLITERATION

Since 1983, MR has used the Cyrillic transliteration in use by ANSI, LC, Zbl, ISI, and others. A table showing the details is at the end of the author/key index.

NAMES OF CHINESE AUTHORS

The name of a Chinese author is placed in the index as though it were in Western form. For example, Hua Luo-geng will be listed as Hua, Luo Geng, as though the author's name were L. G. Hua (in Western form). The pinyin transliteration is used for Mainland Chinese authors and the Wade-Giles transliteration is used for Taiwanese authors.

CONCLUSION

In an undertaking of this size errors are inevitable, despite elaborate precautions and checks. The editors of Mathematical Reviews would be very glad to have their attention drawn to errors in this index and also in the earlier indexes.
